

0101314-02 - INERTIAL REEL UNLOCK

Description

0101314-02 - INERTIAL REEL UNLOCK

New Surplus, Sold Per Each,

An inertial reel unlock is a mechanism that releases a restraint system, such as a seatbelt or harness, by overriding the automatic locking function. It allows for manual or controlled movement when needed, typically in aviation or safety applications.

Part Number Information

Part Number: 0101314-02

Unpunctuated: 010131402

Condition: New Surplus - *These parts are classified as new and unused, meaning they have not been installed or placed into service. However, they come without traceability or original manufacturer certifications, which might be required for certain high-level regulatory uses. Our company provides its own Certificate of Conformance (CoC) as a statement of assurance that the parts are in good working condition and have been sourced from reliable channels. These are ideal when the focus is on cost-effectiveness without compromising on quality.*

Unit of Sale: Sold Per Each - *This item is sold individually, with the price listed for a single unit. Perfect for purchasing the exact quantity needed without the requirement to buy in bulk. For larger quantities, consider reviewing any available bulk pricing options.*
