

138-85300 - STRAIGHT RIGID VALVE EXTENSION

Description

138-85300 - STRAIGHT RIGID VALVE EXTENSION

New, Sold Per Each

Type: Straight Rigid Valve Extension

A valve extension is an accessory used to extend the reach of a valve stem, making it easier to access and operate in tight or recessed areas.

Straight Rigid Extensions: These extensions simplify air service where wheel, rim, brake, or other obstructions hamper access to the tire valve. The valve mouth is extended to the desired position for inflating, gauging, and deflating. An extension core (a special plunger pin) contacts the core in the tire valve. The extension fits regular cap threads (0.305"-32) at the valve mouth, with a washer acting as a seal between the valve mouth and the extension. *Maximum operating pressure: 150 psi.*

Details/Features: For use in Wheels and Brakes

Hex Size (Flats): .38"

Length: 2.5"

Thread Length: 1.25"

Valve Cap Thread Size (Female): .305"-32

Valve Cap Thread Size (Male): .305"-32

Minimized: 13885300

Possible Alternatives: Schrader-Pacific Advanced Valves: 6284, Schrader-Pacific Advanced Valves: 134300

Note: Some part numbers may serve as functional alternatives to the original, offering similar specifications and performance; however, prior verification is recommended to ensure suitability for the intended application.

Product Testing: *Every product is inspected for accuracy, quality, and functionality before shipping to ensure it meets our high standards.*

Alternate Part Numbers: *With the transition from AN to MS and NAS part numbering systems, there are often multiple part numbers that meet the same specifications and performance standards. If only an alternate part number is available, we will contact you to confirm its compatibility with your application. We strongly recommend consulting the appropriate repair manuals to ensure accuracy before using an alternate part.*

Model Compatibility: *We are committed to providing accurate and up-to-date compatibility information for our parts. While the listed models reflect verified applications, this list is continually expanding. If your model isn't listed, it may still be compatible, and we encourage you to consult your repair manuals to verify the required part number before placing an order. Additionally, if you believe a model should be listed, please contact us so we can update our records accordingly.*

New: *These parts are classified as new and come with one or more of the following supporting documents: pick tickets, packing slips, or original labels from the manufacturer. They may also include certifications such as FAA 8130, ATA 106 forms, a Certificate of Conformance (CoC) from the manufacturer, ISC Certification, FAA 121 authorization, or JAA Form 1. These documents verify the authenticity and traceability of the parts, making them suitable for regulated industries where stringent documentation is required.*

Sold Per Each: *This item is sold individually, with the price listed for a single unit. Perfect for purchasing the exact quantity needed without the requirement to buy in bulk. For larger quantities, consider reviewing any available bulk pricing options.*
