

## Mini Excavator High-Carbon Steel Screening Sieve Bucket

### Description

## High-Carbon Steel Screening Sieve Bucket for Mini Excavators

Built for performance and durability, this **high-carbon steel screening sieve bucket** is designed to deliver efficient material sorting for land reclamation, site clearing, and other outdoor earthmoving tasks.

- **Durable Construction:** Made of high-carbon manganese steel for long-lasting wear resistance.
- **Rust-Resistant & Waterproof:** Built to withstand harsh outdoor environments.
- **Efficient Sorting:** 25mm hole diameter ideal for separating soil, debris, and aggregates.
- **Wide Coverage:** 23.6-inch width provides optimal surface area for high-volume screening.
- **Easy Installation:** 88mm center wheelbase and 90mm span length fit most mini excavators.
- **Universal Compatibility:** Engineered to work with most 1.0–1.5-ton class mini excavators.

Whether you're tackling *land reclamation* or *outdoor cleanup*, this screening bucket makes your job easier and faster with reliable performance and rugged construction.

**Part Number:** SCREEN BUCKET –1.0-1.5
